Classification

Ground Level Window Cleaning

Status

Compulsory under Schedule 1

Scope

Business activities include all window cleaning activities, both interior and exterior, which do not require climbing devices of any kind. Such devices include extension ladders, scaffolds, stepladders, stools, swing stages, and similar devices.

For exterior window cleaning, the operator must stand at ground level. For interior window cleaning, the operator must stand on the floor of the stories on which the windows are located or on a stable flat surface which is a permanent fixture of the building.

Operators may use cleaning aids such as extension poles to reach windows higher than the level on which they are standing.

Note

For information on classifying construction work by contract, see the section titled "Classification of Construction Activities" in The Classification Scheme, document 14-01-01, located in the *Operational Policy Manual* and in the Reference section of this Manual.
